

A New Majority Research Bulletin: Low Income Students Now a Majority in the Nation's Public Schools

Southern Education Foundation 2015

<http://goo.gl/i5N6a3>

Low income students are now a majority of the schoolchildren attending the nation's public schools, according to this research bulletin. The latest data collected from the states by the National Center for Education Statistics (NCES), show that 51 percent of the students across the nation's public schools were low income in 2013. In 40 of the 50 states, low income students comprised no less than 40 percent of all public

schoolchildren. In 21 states, children eligible for free or reduced-price lunches were a majority of the students in 2013. Most of the states with a majority of low income students are found in the South and the West. Thirteen of the 21 states with a majority of low income students in 2013 were located in the South, and six of the other 21 states were in the West.

Education Gap Between Rich and Poor is Growing Wider

Edward Porter / New York Times / September 22, 2015

Full article: <http://goo.gl/bqznpv>

(Excerpt) The wounds of segregation were still raw in the 1970s. With only rare exceptions, African-American children had nowhere near the same educational opportunities as whites.

The civil rights movement, school desegregation and the War on Poverty helped bring a measure of equity to the playing field.

Today, despite some setbacks along the way, racial disparities in education have narrowed significantly. By 2012, the test-score deficit of black 9-, 13- and 17-year-olds in reading and math [had been reduced](#) as much as 50 percent compared with what it was 30 to 40 years before.

Achievements like these breathe hope into our belief in the Land

of Opportunity. They build trust in education as a leveling force powering economic mobility. “We do have a track record of reducing these inequalities,” said Jane Waldfogel, a professor of social work at Columbia University.

But the question remains: Why did we stop there?

EARLY INTERVENTION KEY TO COMBATING ILLITERACY

EdCentral Sept. 8, 2015

Full article: <http://goo.gl/P1nO3R>

than proficient readers. The same study found that low-income students who are not proficient readers by the end of third grade fail to graduate from high school at a rate six times higher than proficient readers.

Due to the close link between third grade reading proficiency and

...[according to the Department of Education](#), 30 million American adults can't take part in that simple pleasure because they are unable to read well. That's one out of every seven adults in this country. And the news doesn't get much better when we examine the reading skills of current U.S. students. According to a [2014 report](#) by The Annie E. Casey Foundation, 80 percent of low-income fourth graders and 66 percent of all fourth graders are not proficient in reading as measured by the most recent National Assessment of Educational Progress (NAEP) data.

These fourth-grade numbers are alarming because there is a growing body of evidence showing a direct link between failure to read proficiently by the end of third grade and failure to graduate from high school. Research outlined in a [2013 report](#) by the Annie E. Casey Foundation points out that children who are not reading proficiently by the end of third grade are four times more likely to not graduate from high school

later academic success, states and educational organizations are increasing their focus on building students' literacy skills in the early grades of elementary school. More and more states are passing third grade reading laws that focus on identifying reading deficiencies early and quickly implementing interventions aimed at getting students up to grade level. The Education Commission of the States has put together a [helpful chart](#) detailing the specifics of each state's reading law. Nevada is the most recent state to pass such a law. The [Read by Three Act](#) focuses on early identification of struggling readers and mandates intensive intervention for struggling readers in K-3rd grade.

Leading Pre-K-3 Learning Communities. Competencies for Effective Principal Practice.

Naesp
<http://www.naesp.org/lc>

As the federal role expands to support increased state investments in school-based prekindergarten programs, NAESP has released an updated, principal competency guide: **Leading Pre-K-3 Learning Communities: Competencies for Effective Principal Practice**. Developed by a panel of leading practitioners, this standards document defines new competencies, and outlines a practical approach to high-quality early childhood education that is critical to laying a strong foundation for learning for young children from age three to grade three, or Pre-K-3.

Proven and Powerful Practices

Reclaiming Youth at Risk: Our Hope for the Future

Authors: Larry Brendtro, Martin Brokenleg, Steve Van Bockern

Summary: (from amazon.com)
 Reclaiming Youth at Risk offers educators and others access to unique strategies for reaching troubled youth. This resource explores: -The roots of discouragement in today's youth, including destructive relationships, learned irresponsibility, and a loss of purpose. - How to create a Circle of Courage to give youth a sense of belonging, mastery, independence, and generosity. -How to mend a circle that has been broken. -How to reclaim youth who are troubled or lost.

Review:

This book is a valuable, practical and usable resource. It is appropriate for teachers, counselors, administrators, and support staff from Kindergarten through high school. Educators who implement the Circle of Courage philosophy in their schools and classrooms promote the positive development of all children. The book clearly defines what belonging, mastery, independence and generosity mean and the rationale for implementing them. This book helps us redirect our way of thinking about troubled or "at-risk" youth. It helps educators to think of ways of restoring them to be better people and have better relationships with other youth and adults through practical strategies. It is not a "self-help" or "quick and easy steps" to fixing kids. It is a book that provides educators a way to truly build positive interactions with children who have not had a lot of previous positive experiences with adults.

From the ASI Website

Teacher Diversity in the U.S. is an area of concern. The teacher work force has gotten less ethnically and racially diverse and more female, a development which has had an adverse effect on students, particularly on males of color. It is an impediment to the broader goals of equity and social harmony. ASI is working to better understand teacher labor market trends and identify promising interventions aimed at increased teacher diversity in K-12 education.

This report shows that nationally, progress toward greater diversity is being made, but it is quite modest compared to the need for more minority teachers. In the nine cities studied—Boston, Chicago, Cleveland, Los Angeles, New Orleans, New York City, Philadelphia, San Francisco and Washington, D.C.—the picture is much more bleak, and there are only a few pockets of progress, surrounded by serious setbacks.

Scholarship and Grant Connection

WWW.EDUCATION.NE.GOV/MCE

College costs are increasingly getting higher. Every student needs to be looking for various funding sources for college. The following report provides many strategies for seeking funding for college. Remember it is never too early to start looking for grants and scholarships. In fact there are multiple organizations that offer or promote contests and competitions where they award scholarship dollars as prizes. The time to start looking for funds for college, for every child in 7th grade and above is today.

This site offers great suggestions for all cultures. A free downloadable "How to Find and Win Scholarships" is available at <http://goo.gl/eV0Diu>

The Anti-Defamation League and Inclusive Communities Present:
Inclusion in the Classroom: Understanding Power and Privilege

Join us as we discuss tangible, historical and current examples of identity-based privileges. Presenters will utilize the acronym UAVOIDIT to outline how privilege manifests itself in societies. Participants will be led through the concept of power and how it influences privilege. This session will educate participants on manifestations of privilege and the effects of power in relationships, as well as promote self-awareness of participants' privileges.

Coaching to Assist Teachers of Students Struggling in Mathematics

Webinar: October 17, 2015

- Learn about intervention instruction in elementary and secondary mathematics
- Find out which commonly-used content and instructional practices actually interfere with mathematics learning and are counterproductive to student success
- Explore ways to monitor student progress, specifically in middle school algebra

This webinar is designed for any educators interested in helping elementary or secondary students who are struggling to learn mathematics. School-, district-, and state-level personnel are all welcome to attend. If you are interested but cannot attend the live event, you can still register at the link below and be notified when a recording of the webinar will be available online.
